Max Sum Array Subsequence

```
|-----|-----|
|-----|-----|
| job_id *string* | (Optional) Alphanumeric ID for the job. Can be
non-unique. If this is not passed, the server generates and returns
one | |
| queue *string* | (Optional) Queue to send the job to. Only
workers listening on this queue will receive the jobs.
| |
| eta *string* | (Optional) Timestamp (yyyy-mm-dd hh:mm:ss)
at which the job should start. If this is not provided, the job is
queued immediately. | |
| retries *int* | (Optional) The number of times a failed job
should be retried. Default is 0 | |
| ttl *int* | (Optional) TTL for the results in the results
backend for this particular job. This is NOT supported by the default
SQL DB result backend | |
| args[] *[]string* | (Optional) The positional argument to pass
to the SQL query | the task being executed. This can be passed
multiple times, one for each argument | |
```
